### **DETAILED ACTION**

Claims 1-28 are at issue and present for examination.

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 2, 12-14, drawn to the a thermostable DNA polymerase corresponding to Figure 2.

Group II, claim(s) 3-6, drawn to a nucleic acid which encodes a thermostable DNA polymerase.

Group III, claim(s) 7-11, drawn to a method of sequencing/synthesizing DNA.

Group IV, claim(s) 15, 16, 26-28, drawn to the a thermostable DNA polymerase corresponding to Figure 3.

Group V, claim(s) 17-20, drawn to a nucleic acid which encodes a thermostable DNA polymerase.

Group VI, claim(s) 21-25, drawn to a method of sequencing/synthesizing DNA.

The inventions listed as Groups I through VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Where a group of inventions is claimed in an application, the requirement of unity of invention shall be fulfilled only when there is a technical relationship among those inventions

Art Unit: 1652

involving one or more of the same or corresponding special technical features. The expression "special technical features" shall mean those technical features that define a contribution which each of the claimed inventions, considered as a whole, makes over the prior art. U.S. Patent No. 6,265,193 B1 teaches a DNA polymerase corresponding to the substitution E681, and thus, the shared technical feature of the groups is not a "special technical feature", unity of invention between the groups does not exist.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
